FLOOD INSURANCE RATE MAP (FIRM) UPDATE TIMELINE

Milestone Responsibility ◆ HCFCD ◆ FEMA

HCFCD will engage community officials, decision makers and technical staff to relay project findings. These touchpoints will allow HCFCD to discuss study findings throughout their creation and preparation.

PROGRESS TO DATE

About MAAPnext

The Harris County Modeling, Assessment and Awareness Project (MAAPnext) is developing the next generation of flood maps and tools. Along with new Flood Insurance Rate Maps (FIRMs), new flood risk tools will be developed for communicating the results of this project. Changes are on the way for Harris County flood maps, and we want to ensure this information is clear, easy to understand, and accessible to all residents. The new FIRMs would be effective as early as 2024.

The MAAPnext team anticipates delivering results to FEMA by the beginning of 2022. Public outreach campaigns in 2022 will begin with virtual public meetings to preview the MAAPnext Online Application. Community members will have the opportunity to type an address into the application and view flood risk products developed with MAAPnext data. Social and traditional media campaigns will inform and educate the public about their flood risk in Harris County.

Upcoming Advisory Group and Flood Risk Review Meetings

The MAAPnext team will update the Community Advisory Group, Technical Advisory Group, and Floodplain Administrators around the county with a preview of the preliminary data before it is officially sent to FEMA.

Upcoming Meeting Dates:

- **Community Advisory Group** – November 10
- **Technical Advisory Group** – November 11
- **Floodplain Administrators Flood Risk Review** - November 18

Online Application Development

Next Step:
