Background and Discussion:

This project is to provide funding to the City of Houston for continued dredging operations on Lake Houston. The Flood Control District will not handle any of the work.

Expected Impact:

This project, led by the City of Houston, will remove accumulated sediment in Lake Houston allowing stormwater to reach the lake more efficiently reducing flooding risks in surrounding developments. Additionally, the dredging efforts will restore lost water storage capacity in the lake.

Alternative Options:

The alternative would be to not provide funding to the City of Houston.
