Project Description:

This project is to enhance the usage of PeopleSoft across Harris County. There are two key focus areas for

this project: 1) Automation and Efficiency; and 2) Enhanced Reporting and Analytics.

Automation and Efficiency will focus on automating the manual interfaces for the business. Enhanced Reporting and Analytics will build out the reports and functionality in PeopleSoft to ensure departments have easy access to the data and functionality they need.

Project Scope:

To accelerate the backlog and continuous volume of enhancement requests to the PeopleSoft application to support ongoing business needs and regulatory requirements. Enhancements include PeopleSoft upgrades, interfaces/integrations, reports/queries, new functionality requiring configuration and customizations for business users from departments and agencies including Auditor's Office, Purchasing, Office of Management and Budget, Office of the County Administrators, Engineering, Equal Employment Opportunity, Facilities & Property Maintenance (FPM), Flood Control, Human Resource & Risk Management, and Precincts.

Justification:

This project would improve efficiency by reducing manual data entry for departments, freeing up resources to focus on more value-added work. The project would also improve efficiency by making it easier to access data and secure historical data, so it is available for future audits.

For example, the Treasurer and Auditor's Office staff currently must manually enter cash receipts in PeopleSoft and reconcile cash entered in jWeb for CSCD and Sheriff's office. The PeopleSoft team plans to automate these processes by creating integrations between jWeb and PeopleSoft. Additionally, the PeopleSoft team is building interfaces to integrate PeopleSoft with department systems like Tririga, eBuilder, Unifier, B2GNow, etc. These interfaces replace manual and duplicate processes (otherwise required to keep systems in sync) and create a single source of repository for ease in data retrieval and reporting. The PeopleSoft team would also build several queries and reports to help department users retrieve reports quickly. PeopleSoft upgrade provides opportunities for innovation. For example, the older/classic Time Entry screen will not be supported by Oracle and therefore the new Fusion Time Entry must be implemented to harness the new functionality.

Alternatives and Engagement:

Alternative	Alternative Description	Why Alternative Not Selected
Delay	Do the automation project at a later date.	This option will delay the benefits being achieved for Harris County and cause the continuance of labor-intensive, manual work-arounds. Production support will stay high and impact US ability to cross-train
Do not pursue	Do not implement automation and reporting functions	Failure to enhance the automation and reporting capabilities of the new ERP would reduce the effectiveness of the new system.

Other	Solve the problem through another means.	No other feasible technology alternatives have been identified.
