Background and Discussion:

This is the final part of Project Brays. Project Brays is a cooperative effort between the Harris County Flood Control District and the U.S. Army Corps of Engineers designed to reduce the risk of future flooding. Project

Brays is expected to provide a 1% (100-year) level of flood protection west of the Sam Houston Tollway. Project Brays is expected to reduce the number of structures at risk from 16,800 to 1,800. Due to additional construction delays the amount of time anticipated to complete, the project was extended. This resulted in additional construction phase service funds being required to complete this project.

Expected Impact:

Funds being increased and project completion.
