### Request Summary (Agenda Caption):

Request for approval of a certain project, decreeing the project to be a public necessity and convenience, directing the Harris County Real Property Division to acquire, and authorizing eminent domain, if necessary, for one (1) fee simple tract for the public project known as Sierra Ranch and Stonefield Terrace Sec 3 Subdivisions Drainage Improvements - 2018 project, for the purpose of stormwater detention/retention, UPIN 19101MF12E01, Precinct 3.

### Background and Discussion:

The proposed project consists of local drainage improvements which will serve the Sierra Ranch and Stonefield Terrace Section 3 subdivisions. The drainage analysis identified significant ponding to occur within the subdivision, so the proposed improvements consist of 19 additional inlets and approximately 420 linear feet of storm sewer improvements within Sierra Ranch and a proposed detention pond within Stonefield Terrace

Section 3. The proposed improvements do not include any improvements to the P122-00-00 channel, but outflows into P122-00-00 will not be increased under proposed conditions.

**Expected Impact:**

The proposed improvements will significantly reduce localized ponding within the subdivisions during storm events up to and including the 100-year event. The proposed improvements will ensure there is no localized ponding during the 2-year and 10-year storm events and will reduce 100-year ponding depths within the neighborhood by an average of 0.4 feet, with the largest reduction being 0.7 feet. The number of inundated parcels during the 100-year event, factoring in a 10-year tailwater condition on P122-00-00, will be reduced from 65 to 36. The area inundated during the 100-year event, factoring in a 10-year tailwater condition on P122-00-00, will be reduced from 12.7 acres to 8.9 acres under proposed conditions.

**Alternative Options:**

Storm sewer improvements within Stonefield Terrace Section 3 were evaluated, but the proposed detention basin provided a more significant reduction in ponding depths, with less impact/disturbance to the subdivision. Restrictors are proposed at the existing Sierra Ranch detention basin to prevent increased outflows under proposed conditions.

Two alternatives were evaluated, one proposing additional excavation within the existing detention basin in lieu of the restrictors. The other alternative included a new detention basin in the left overbank of P122-00-00 but this would result in additional acquisitions.

**Alignment with Goal(s):**

- ☐ Justice and Safety
- ☐ Economic Opportunity
- ☐ Housing
- ☐ Public Health
